

MICROQUICK

ENGINEERS

The Foremost Supplier of Hydraulic Dispersion Kneader in the Rubber Industries

- Automation of Ram- Pressure Block movement
- Innovative Shaft Seals to stop leak of ingredients
- Wear Resistant of Mixing Chamber to ingredients
- Anti Breakage properties of Rotors

BENEFITS:

- ✓ Batch Preparation time 8 to 15 minutes
- ✓ Consistent Quality Compounding of each batch
- ✓ Excellent Dispersion of Ingredients
- ✓ Convenient to produce Harder Batches 80-90 Shore A
- ✓ Minimal fly loss of ingredients
- ✓ Convenient to Operate, Ease to maintain

Manufacturer of Automatic Compression Rubber Moulding Machine

- 4 Column Style Mechanism, Adjustable Daylight.
- Vacuum Type
- Proportional Hydraulic Pressure and Flow System
- PLC Control System
